Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-6, 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Miller et al (US2003/0060308 A1).

Regarding claim 1, Miller et al discloses a module for a playing area comprising at least two panels (20) of elastically deformable material having a curved surface and at least two orifices; at least one orifice enabling the installation of a removable fixing means (see figures 3 and 4); at least one ground fixing orifice (see figure 3).

Regarding claim 2, Miller et al further shows the at least two orifices have same axis of symmetry (cavity 27; see figure 1).

Regarding claim 3, Miller et al shows the at least two panels have three grounding fixing orifices (see figure 3).

Regarding claim 4, Miller et al shows the two panels further comprise at least two assembling orifices provided at a mid-position between two corners of the two panels.

Regarding claim 5, Miller ET at shows removable fixing means can be a stakes (see figures 3 and 4) or (handle 40, impact dampener 50 and handle 80; see figure 8), alternatively VELCRO can be used as a fastening means (see paragraph 0018).

Regarding claim 6, Miller et al shows the ground-fixing means includes at least one support cooperating with a counter weight (see figure 8).

Regarding claim 9, Miller et al shows the module is circular/cylindrical or alternatively pyramidal.

Regarding claim 10, Miller et al shows the module can be formed of any flexible resilient and airtight material such as plastic, rubber and the like and coated with polyurethane material (see paragraph 0036).

Regarding claim 11, note the rejection of claim 1.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al (US2003/0060308 A1).

Regarding claims 7 and 8, Miller et al does not disclose expressly the inclusion of one or more targets on the outer panel of the module and the means for attaching the target to the module. The Examiner takes Official Notice that the inclusion of one or more targets on the outer surface of the module and utilizing various attachment means is old and well known and obvious to incorporate because it increases the difficulty level for hitting the particular target area when playing a game.

Double Patenting

5. Applicant is advised that should claim 1 be found allowable, claim 11 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).
